

Product info page: **Single Tile Towers**

Vision 10-tile single tile tower displays are a very popular way of quickly showing a product range within a small footprint. Three versions are available from stock in our standard silver finish: 45 degree, Horizontal & Herringbone. All versions will hold 10 x tiles up to 15mm thick. Vision often manufacture version for different thickness tiles or stone if required, call the sales office for further details.

Herringbone version

45 degree version

Horizontal version

Vision can also provide special towers including versions that allow for point of sale to be displayed either at the top or bottom as required. Available in a wide range of other colours and with different width channels to hold products thicker than 15mm if required (up to 30mm). All variations made to order.
