

POS/Logo Artwork Preparation service

All files supplied should be based in the CMYK colour mode.

Images **MUST** have a resolution of between 300-350 dpi.

All artwork supplied **MUST** have at least 3mm bleed on all trimmed edges.

When using images in certain software, such as QuarkXpress and Adobe Photoshop, we require the original image files along with the document file. Without these, we may not be able to print your document.

TIFF files should be used for all photos and EPS files should be used for logos/drawings.

JPEG is acceptable, however, please keep the quality to maximum.

Hi-resolution PDF files are also acceptable.
