This adjustable display system is perfect for showcasing tile and flooring samples, including popular sizes such as 30cm and 60cm deep tiles and planks, as well as products up to 20mm thick.

Its secure, space-saving design mounts directly to the wall and displays samples at an angled view for easy customer browsing.

**Adjustable Wall Rack Display**

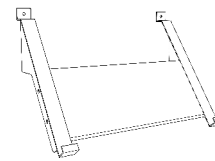

## Display Components Included (3no.)

The Adjustable Wall Rack is made of **three modular components**.

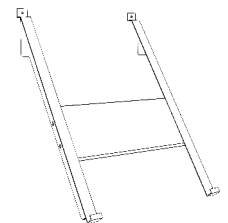

The main **Slotwall** and the **Angled Tile Supports**. These are all purchased individually to best suit your space and product requirements.

Slotwall

ATS 1  
(Designed for  
300mm Deep Tiles)

ATS 2  
(Designed for  
600mm Deep Tiles)

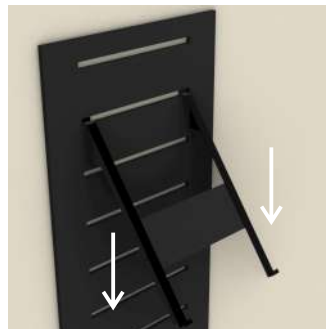

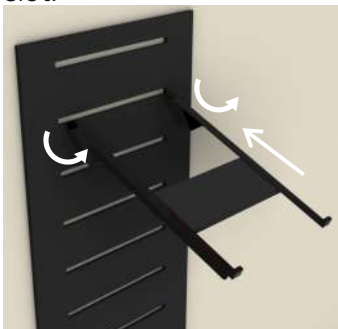

## Display Features

- Designed to **display tile, stone, wood and laminate flooring products**.
- Use of **Metal Fabrication for Strength**.
- Powder coated to a colour of your choice.
- Easy Installation.
- Customizable **Layout that can be changed whenever you want**.
- Adaptable for future product changes.
- Comes in a standard size but can be redesigned to alternatives sizes.  
**Contact our Sales Department for more details.**

## Display Use

### “Slot and Drop” Application

Want to change the layout of the display? Simply move the tile supports by sliding them out and back into a different slot.

### Bespoke Display Formats

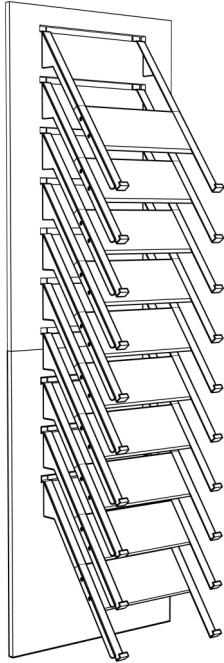

The Modular Wall Rack system lets you display your product in multiple formats on the wall!
