Quick Description

The TileBAR is a streamlined product display system engineered specifically for boutique spaces. The system consists of two primary parts, the **Slotwall and the **Cube & Vertical Array System**.**

Each features purpose-designed, fully customisable components that allow you to showcase your products effectively while maximising your floor and wall space.

Introduction

The Story Behind the TileBAR

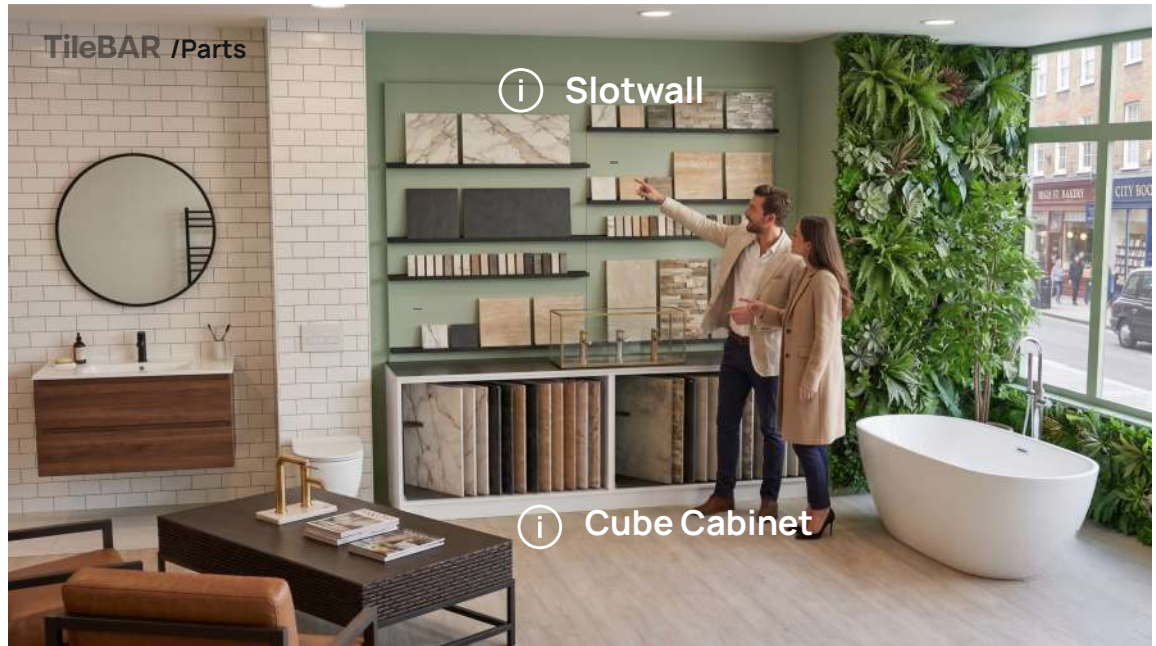

In boutique retail tile and trade bathroom showrooms, your displays are an important part of your brand presentation.

If a space feels cluttered, the decision-making process can feel overwhelming for the customer. We developed the **TileBAR** to rethink how surface materials are presented.

Quick Info

TileBAR Display Features

The TileBAR is made of **two primary parts**, the **wall mounted Slotwall** and the **Cube & Vertical Array System**. These both have their own individual display components.

The next page goes into these display components in more detail!

TileBAR Size

The TileBAR can be redesigned to any size required to best suit the available space in your showroom!

TileBAR

Display Features Overview 1/2

TileBAR Components

Part 1 Display Features

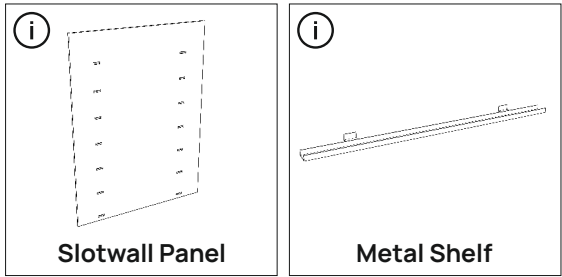

Part 1 consists of the **Slotwall panel** and the **Metal Shelves** that slot into it.

These act as the presentation wall aspect of your display.

Both of these components can be redesigned to a different size, as well as also been finished in a similar colour to your existing walls.

Part 1 Components

Component	Material	Finishes Available
Slotwall Panel	Melamine Faced MDF	  
Metal Shelf	Folded Steel	  

TileBAR Components

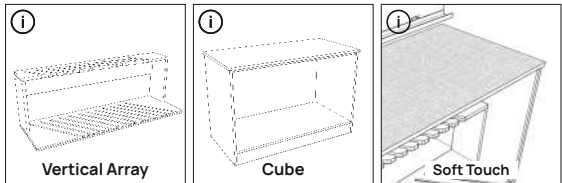

Part 2 Display Features

Part 2 consists of the **Cube Cabinet**, **Vertical Array System** and the **Soft Touch Material** that is placed on top.

These act as the product library of your display. The Cube & Vertical Array System can be redesigned to a different size, to better fit your product or showroom space.

Part 2 Components

Component	Material	Finishes Available
Vertical Array	Black Thru Dyed MDF	
Cube	Melamine Faced MDF	 
Soft Touch Material	Soft Roll Material

Slotwall

The slotted shelves allow you to display product in whichever way you want.
The Slotwall is a simple panel that is fixed to your wall via a batten system. Once fixed, simply slot in your metal shelves and place your product!

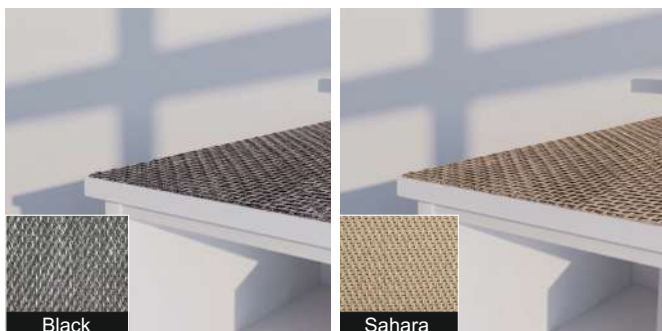

Slotwall

The Slotwall can be colour matched to your existing wall (at added cost) so that it blends in seamlessly with the vibe of the showroom space!

Cube & Vertical Array System

The TileBAR comes equipped with **Vision Display's Cube & Vertical Array library system**. This is fundamentally a melamine faced MDF box that houses a black thru dyed MDF component. This component holds the tiles upright and allows them to be viewed by customers by simply sliding them out of the grooves.

Soft Touch Material

The Soft Touch is a material than can be applied to the top of the Cube. This allows product to be placed securely on top!

The Soft Touch material absorbs the impact of heavier items, ensuring smooth and quiet placement.
